Self Serve Kiosk

The Kiosk is configured just like a standard POS terminal and supports customer loyalty, EFTPOS integration and all features that are available in the POS.

Pocket Pad

Speed up service with the ability to take orders and payments on the fly. Fully integrated with **idealpos**, provide staff with preconfigured prompts they can use to upsell to customers.

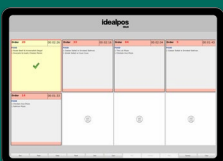

Stock Management App

Perform a stock-take on all your locations, transfer stock between locations, receive items into stock and assign barcodes to all items.

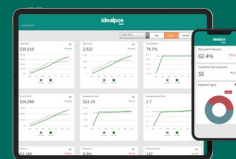

Table Map

The table map is completely customisable and can facilitate the configuration of many different functions. Each colour represents a different status for the table.

Kitchen Monitor

Allow kitchen staff from anywhere in the kitchen to view the order and help keep service moving at a fast rate.

Cloud Reporting

Access your reports online, anywhere, anytime. Keep tabs on your daily takings, KPIs and compare your selected period's performance to previous equivalent periods.
